1. Introduction

WeblifeGold is a token specially designed to achieve an exponential growth in the community that supports our business ecosystem; our community gives massive use of decentralized achieving a positive social impact.

Normally Cryptocurrencies market and tokens are often in control of a small group of people unlike WeblifeGold seeking that entire guild pertaining to our business ecosystem be benefited having control over the token.

The members of our community using our token for all types of transactions, purchases, sales, withdrawals, deposits and exchanges, each of our projects leads to increased transactions between those who support our company and our ecosystem. WeblifeGold seeks to impact international way using as a tool affordable investment for all kinds of people leaving aside the monetary exclusion in dozens of countries.

Thanks to the profits generated by each of our companies have been able to finance many social, cultural and educational projects benefiting vulnerable communities or do not have the same opportunities as other people, our social work seeks and reverberant entrepreneurship and Colombian innovation of young talent through financial education and the potentiation of projects and ideas; all this has been run by the young synergy foundation.

2.Information the token and its network

2.1 Tokenomics

- Start date of ico: November 24, 2018
- Soft cap: \$ 2,000,000 USD
- Hard cap: \$ 21,000,000 USD
- Preminate amount of tokens: 6,000,000
(To clarify, this amount began to be distributed to 10,000 coins among members of the community Gold, 500,000 tokens were sent to the address of the contract)
- maximum number of tokens that will be on the market: 21,000,000
- Initial sales price unit token: \$ 1 USD
- Conversion rate: 1 Ethereum equivalent to 200 tokens
- Decimals: 2

2.2 Payments person to person

WeblifeGold is a token, we hope that its availability is open to anyone wishing to participate in the project. Thus genuine autonomy given to our users because there is no centralized unit that limits the financial control of our token. From 2009 with the arrival of the first crypto currency it has made it easier for the company to increase its financial autonomy.

2.3 Contract Erc20

"Ethereum is a decentralized platform on which intelligent contracts are executed" Our token based on smart contract ERC20 represents a financial value on the blockchain ethereum thus strengthens both ethereum ecosystem as WeblifeGold ecosystem strengthening demand so directly proportional. To build on the contract ERC20 us facilitates interoperability of the token within our ecosystem, thus giving control of all transactions.

2.4 Lack of community governance

One of the main problems in current criptomonedas is the lack of community participation in the project, so the community is benefiting in full; As a result forks were created. Thanks to the lack of democracy in the community for making important decisions against the currency. Why WeblifeGold seeking alternative exponential growth of Community support in the decision-making of our token.

3. Comparing WeblifeGold

Solving problems 3.1

Our token tries to solve the typical problems of current main focus criptomonedas and take the lack of governance of different communities; This is achieved thanks to the sense of belonging that is our community with our business ecosystem projects.

3.2 Implementing the solution

Sometimes the solution to the problem is usually net motivation, so that the sense of community ownership to your project is increased, thanks to WeblifeGold developing a comprehensive business ecosystem, it is feasible that community members support the project this interest as a result of diversification.

4. Explanation WeblifeGold

4.1. Mission and Development

In 2017 a group of businessmen want to run projects which will increase the development and growth of the orange economy through business traditional economy, that would help hundreds of Colombians to improve their income through investment and financial autonomy; 10 projects were created to receive criptomonedas who entered as payment. The development team sped up the task of positioning each of the companies in our ecosystem benefiting our community and income.

After the positioning of our projects started collaborating community to facilitate the investment process and work of our projects by a token that would allow us access to the global community and expand our contribution.

WeblifeGold's mission is to help organize financial investments and profits of the business community belonging to our ecosystem.

4.2 Community Gold

Before and during the development process of our token our community has grown exponentially in addition to each of the members they have proven to be collaborative and enthusiastic about the project scope. Operating as token increase the chances that integrates community every day but fostered an entrepreneurial environment that positively contribute to the Colombian technological development.

Community, who are encouraged to express their views on addressing future projects; the community members with the skills to carry out larger projects for WeblifeGold are empowered and encouraged by the development team to contribute as they see fit. The platform is a collaborative platform value-added constantly evolving, developed and run by the community and the talented development team.

4.4 Decentralized system

For WeblifeGold it is paramount to grow exponentially, and this can only be achieved by working together, so that each of the members of our ecosystem look equally benefited guaranteeing 100% security for those who support our projects. Given the importance given to Gold members our system becomes fully decentralized and this creates a bond of ownership, loyalty and active participation for the growth of our business ecosystem.

4.5 WeblifeGold on the market

WeblifeGold has a community of support, facilitating the process of adoption by the target market; thanks to all our projects with experience and transcendence is possible to give usability to our token, so Gold members can buy all kinds of goods and services required using our token as payment, our projects traditional economy focused on criptofinanciero market Colombians seek to encourage other enterprises to receive criptocurrency and token as payment, thus potentiating the proper use of token weblife Gold. As a result of our hard work comes usability in a wide commercial market benefiting our entire community.

4.6 Our foundation

For 3 years our young synergy foundation has generated support and potentiation dozens of young students and artists seeking new alternatives of entrepreneurship and innovation, given that young synergy is a non-profit, the token WeblifeGold has allowed us to have a massive reach of children and teenagers benefit funds and providing necessary strategies, social communities acquire the necessary financial training to encompass Colombian business unexplored territories.

4.7 Distribution Quick Start

Our community has a high sense of belonging and this has allowed us to grow exponentially, the distribution is growing every day thanks to the initial project contributors, they convey the idea of teamwork increasing distribution figures in record time the community benefit is the one who really helps easy and rapid adoption of our token.

5. Cryptocurrency as an alternative for a better world

Since 2009 with the creation of bitcoin, the cryptocurrency that were developed have revolutionized the economy and global finance, every day there are more people that will encourage you to be part of the rafter, the filosofia of criptomonedas goes beyond generating income further, it is teamwork and constant struggle for a common benefit. The criptomonedas become an alternative of fighting for positive change in the system to achieve financial freedom without depending on government or banking entities.
