1. Introduction

Weblife Gold it's a token specially designed to achieve an exponential growth in the community that supports our business ecosystem; our community uses it massively in a decentralized way, thus achieving a positive social impact. Normally the cryptocurrencies and tokens of the market are usually in the control of a small group of people unlike weblife Gold that seeks that all the guild belonging to our business ecosystem is benefited by having control over their token.

The member of our community use our token for all types of transactions, purchases, sales, withdrawals, consignments and exchanges, each of our projects gives way to increased transactions between those who support our company and our ecosystem.

Weblife Gold seeks to impact internationally using as a toll affordable investment for all types of people leaving aside the monetary exclusion that is found in dozens of countries.

Thanks to the profits generated by each of our companies we have managed to finance multiple social, cultural and educational projects that have benefited vulnerable communities or that do not have the same opportunities as other people, our social works seeks to increase entrepreneurship and innovation of young Colombian talent through financial education and the potentialization of projects and ideas; all this has been executed through the young synergy foundation.

2. Bitcoin

2.1 Payments person to person

Weblife Gold will not be cryptocurrency, because we want its availability to be open for those who wish to participate in our project. In this way we grant our users a true autonomy, since there is no centralized dependence that limits the financial control of our token. As of 2009, with the arrival of the first cryptocurrency, society has been enabled to increase its financial autonomy, thanks to the peer to peer payments system.

2.2 Blockchain Erc20

“Ethereum is a decentralized platform on which smart contracts are executed” Our ERC20 token represents a financial value in the blockchain ethereum, thus strengthening both the ethereum ecosystem and the weblife Gold ecosystem, strengthening demand in a directly proportional way. By basing ourselves on the ERC20 interface, we facilitate the interoperability of the token within our ecosystem, thus giving control of all types of transactions.

2.3 Lack of Community Governance

One of the main problems in the current cryptocurrencies is the lack of community participation in the project, this is because most of the total control of the currency, in this way the community is not benefited in its entirety; as a consequence of this, the bifurcations were created, such as bitcoin cash and bitcoin gold. Thanks to the lack of democracy in the bitcoin community in terms of making important decisions regarding the currency. That is why weblife Gold seeks as an alternative the exponential growth of community support in the decision making of our token.

3. Comparing WebLife Gold

3.1 Solving problems

Our token tries to solve the typical problems of the current cryptocurrencies and as a main focus we take the lack of governance of the different communities; This is achieved thanks to the sense of belonging that our community has with the projects of our business ecosystem.

3.2 Implementing the solution

Sometimes the solution to the problem is usually net motivation, so that the sense of belonging of the community to your project is increased, thanks to the fact that weblife gold has developed a large business ecosystem, it is feasible that the members of the community support the project of your interest this as a consequence of diversification.

4. Weblife Gold explanation

4.1. Mission and development

In 2017 a group of entrepreneurs want to execute projects that will contribute to the development and growth of the orange economy through traditional economy businesses, which would help hundreds of Colombians improve their income through investment and financial autonomy; 10 projects were created that ventured to receive cryptocurrencies as a means of payment. The development team streamlined the task of positioning each of the companies in our ecosystem, benefiting our community and its income.

After the positioning of our projects we began to collaborate in community to facilitate the process of investment and work of our projects through a token that would allow us to access the global community and expand our contribution.

The mission of weblife Gold is to help financially organize the investments and utilities of the community belonging to our business ecosystem.

4.2 Gold Community

Before and during the development process of our token, our community has grown exponentially in addition to the fact that each member has proven to be collaborative and enthusiastic about the scope of the project. By functioning as a token, the possibilities for the community to integrate more every day, fostering an entrepreneurial environment that positively contributes to Colombian technological development, increase.

the community, who are encouraged to express their opinion on the direction of future projects; community members with the skills to carry out larger projects for weblife Gold are empowered and encouraged by the development team to contribute as they see fit. The platform is a collaborative value-added platform in constant evolution, developed and directed by the community and the talented development team.

4.4 Decentralized system

For weblife Gold it is very important to grow exponentially, and this can only be achieved by working as a team, so that each member of our ecosystem benefits equitably, thus guaranteeing 100% security for those who support our projects. Given the importance that Gold members are given, our system becomes totally decentralized and this allows us to create a link of appropriation, loyalty and active participation for the growth of our business ecosystem.

4.5 Weblife Gold in the market

Weblife Gold has a giant support community, which facilitates the adoption process by the target market; Thanks to all our projects that have experience and transcendence it is possible to give usability to our token, so that Gold members can acquire all kinds of goods and services using our token as a means of payment, our traditional economy projects focused on the crypto-financial market seeks to incentivize other Colombian enterprises to receive cryptocurrencies and token as a means of payment, thus enhancing the own use of the weblife Gold token. As a result of our hard work, usability arises in a large commercial market, thus benefiting our entire community.

Our token goes on the market with a preminated of 6,000,000 coins and an established maximum of 21,000,000.

4.6 Our foundation

For three years, our young synergy foundation has empowered and empowered dozens of young students and artists seeking new alternatives for entrepreneurship and innovation, given that young synergy is a non-profit foundation, the weblife Gold token has allowed us to have a massive reach of benefited children and adolescents providing funds and necessary strategies, the social communities acquire the necessary financial training to cover unexplored Colombian business territories.

4.7 Quick start distribution

Our community has a high sense of belonging and this has allowed us to grow exponentially, the distribution increases day by day thanks to the initial contributors of the project, they transmit the idea of teamwork thus increasing the distribution figures in record time, the community benefit is the one that really helps the easy and quick adoption of our token.

5. Cryptocurrencies as an alternative for a better world

Since 2009 with the creation of bitcoin, the cryptocurrencies that were developed have revolutionized the economy and global finances, every day more people are encouraged to be part of the change, the philosophy of cryptocurrencies goes beyond generating income additional, it's about teamwork and a constant struggle for a common benefit. The cryptocurrencies become an alternative to struggle for a positive change in the system to achieve financial freedom without relying on governmental or banking entities.
